Decoland D-Edge Pro

Paths, walkways, lawns and borders are easily separated by our 13 cm high “D-Edge Pro” professional edging. Comes in 15 m long roll. Flexible, safe and universal in its application either curved or straight. The zig-zag profile ensures additional hold in the soil. Virtually invisible, easy to install and safe for those enjoying games in the garden. The 2.5 mm thick profile prevents any injuries commonly experienced with metal or thin plastic products. The 3 mm rounded top for additional safety in gardens and playgrounds. D-Edge Pro is light in weight, easy to cut with scissors to create your own design virtually without any limits. Available in 2 colors (black & green) to match the outdoor application and environment. D-Edge Pro is made of high density polyethylene and is fully recyclable underlining our strive to care about people and environment.

Roll length	: 15 m
Storage	: Stored in Coils

* In favor of product improvements, specifications may change without prior notice.

Installation Instructions

Uncoil the D-Edge Pro by putting a weight at the ends during mild ambient temperature, preferably in the sun. This allows the edge to flatten.

Create a ditch to separate two area's by the D-Edge Pro and insert vertically, allow enough to prevent soil, gravel or mulch to easily drop into the adjacent area as shown.

Whilst keeping the edge down, push the soil firmly against the D-Edge Pro.

* Instructions for installation are guidance only and subject to local rules and regulations
