Decoland LEDeg

Decoland D-LEDge offers a sustainable and innovative solution for defining paths, walkways, lawns, and garden borders with integrated LED lighting. Maintaining the core features of the original Decoland Smart Pro Edge, this upgraded version introduces a transparent body that houses LED strips to create a subtle, elegant glow—enhancing both visibility and ambiance in outdoor environments.

Its soft, rounded top ensures safety for both children and pets, eliminating the risks often associated with sharp metal or rigid plastic edges.

Supplied in 15-meter coils, Decoland D-LEDge is lightweight, highly flexible, and easy to shape into curves or straight lines. It can be trimmed with standard scissors, enabling customized installations across a wide range of landscape designs.

Decoland D-LEDge reflects our commitment to blending eco-conscious materials with creative functionality, delivering a durable and visually striking solution for modern outdoor spaces.

PS. The D-Ledge is supplied without the led light.

Technical Specifications*

GENERAL

Material	: High Density Polyethylene (HDPE) - (recyclable)
Master Batch CB 25%	: 1%
Actual carbon content	: 0 %
Color	: Transparent
UV and frost	: UV resistant

Installation Instructions

Uncoil the D-LEDge by putting a weight at the ends during mild ambient temperature.

Create a ditch to separate 2 area's by the D-LEDge and insert vertically, just low enough to prevent soil, gravel or mulch to easily drop into the adjacent area.

Whilst keeping the edge down, push firmly the soil against the D-LEDge to fix it.

* Instructions for installation are guidance only and subject to local rules and regulations
