WaterUps Square Planter

The WaterUps Square Planter Kit is a self watering planter box. An ideal solution for use on balconies, terraces or courtyards. No worries about the watering, you've got >17 liters of water, enough to keep your plants of vegetables happy and healthy for weeks. Proven water savings of 80% and more. Just fill the reservoir when almost empty. Produce 30% more fruits or flowers due to optimized moisture in your potting mix.

Environmental and technical expertise

Decoland globally adheres to the United Nations Sustainable Development Goals. WaterUps is fully in line with our policies in the use of recycled polypropylene, 100% recyclable at the end of life and saving up to 80% of water.

Combating heat-island effects by planting trees will help create a better world for our future generations.
